PC09-3	BB Oxalic acid heater (upgraded) (Patent)		<p>Connect the vaporizer to 220V/110V power source. It will take approximately 1 minute to reach preset temperature. The red sequence readout will display 280 when ready. In the white lids (recess side up) place the appropriate amount of OA. Invert the vaporizer. Take the white lid containing the OA and push it onto the bowl (be careful the vaporizer bowl is very HOT!) Place the still inverted vaporizer stem (with lid attached) into the drilled hole then turn the vaporizer right side up and tap the lid. The acid will fall into the bowl and start to vaporize.
